I.M. Sechenov First Moscow State Medical University
Moscow, Russia

About I.M. Sechenov First Moscow State Medical University

I.M. Sechenov First Moscow State Medical University is the oldest leading medical university in Russia that has become a cradle of most medical schools and scientific societies of our country. For decades it has been unofficially known as “First Med”. University success is based on a blend of glorious traditions and actual innovative approaches multiplied by a great potential of human resources. We are proud to be a unique educational, scientific and medical complex that graduates, certifies and provides lifelong professional education for physicians and other healthcare workers; that contributes significantly to the domestic and global medicine. The University is closely linked to the fundamental and applied research, highly efficient medical treatment, and propaganda of medical and pharmaceutical achievements. Our University is rich with knowledge and experience that is generously transferred to our students, to those whose mission will be to face the challenges of the 21st century in the field of medicine and people aiding, to implement new methods and technologies in healthcare.

Clinical Campus:
The Clinical Campus of I.M. Sechenov First MSMU was founded in 1987 and is recognized as one of the world’s best. It is not only an inimitable architectural center and a famous historical landmark, but also a unique center where future doctors study, physicians continue medical education, scientists carry out research, the most difficult patients receive specialized high-tech medical care.

Clinical Simulation Center:
Clinical Simulation Center of I.M. Sechenov First MSMU differs from all other analogue centers by a wider range of contingent (from citizens to qualified physicians), wider areas of training (general medicine, preventive medicine, internal diseases, surgery, obstetrics and gynecology, anesthesiology and reanimatology, pediatrics, radiology, cardiology, urology, healthcare management, nursery, basics of the first aid, etc.), as well as the system approach to the evaluation of results.

Library:
The Central Scientific Medical Library of I.M. Sechenov First MSMU dates back to 1919 when the first small sets of books were received. Over the years the Library has evolved into the one of the biggest European centers of scientific medical data. Nowadays the Library has at its disposal a unique collection of scientific publications in medicine and healthcare and one of the Russia’s best Centers of Library Information Technologies Development and Introduction.
The Botanic Garden of I.M. Sechenov First MSMU was established in 1964. First implantations were conducted in 1947 by efforts of students and academic staff. Many species of plant were brought from various parts of Russia and foreign countries, from almost every continent. A wide range of exotics, e.g. sorts of barberry (Berberis), birch (Betula), hawthorn (Crataegus), maple (Acer), moonseed (Menispermum), alder (Alnus), lilac (Syringa), rowan (Sorbus), apple (Malus), etc.

Supporting an idea of preventive healthcare I.M. Sechenov First MSMU has its own stadium named Burevestnik (Russian for Storm petrel) at the disposal of students and staff members of the University. It is closely located to the academic buildings and hospitals and comprises a football field, two track-and-field sectors, four tennis courts and a tennis wall, as well as artificial playground, gym, halls for sports classes, changing rooms, shower cabins, etc.

The Museum of the History of Medicine was established in 1990. Since 2004 it is situated in the very center of the Clinical Campus in one of the most beautiful University’s buildings that was built in 1896.
